Parents: this activity requires your child to think about the 'properties' of the numbers they are looking at - aspects such as their size and the value of their digits. It also requires children to use a process of elimination to find out which number relates to which clue, so they will be thinking about all the numbers they have to choose from. Encourage your child to be methodical, as there may initially be more than one option for each clue. They could perhaps jot ideas down on a piece of paper, before they choose their answer.
